

2-Step Positioning Platform for C-Arm Digital Radiography Systems

The design of the 2-Step Platform for C-arm Radiography permits patients to be positioned over a variety of C-arm digital radiography systems, including those made by Swissray, IMIX, and others.

The platform places the patient in the optimal position for easy capture of the highest quality weight-bearing AP foot images.

Dimensions, top platform:

Height: 18 in.

Width: 28 in.

Length: 32 in.

Handle height: 53 in.

- *Designed for patients weighing up to 500 lbs*
- *Keeps patient's foot as close to the image plate as possible to ensure high quality images*
- *Sturdy two-sided hand rails*
- *Easily portable with full locking swivel casters*
- *Easy to keep clean, the platform is made from germ-resistant, non-porous polyethylene and steel*
